READY TO GO?

We could tell you about the technology, engineering, design, and expertise that go into building the new i20, but nothing compares to actually seeing it, driving it, and feeling it. So, grab your mates for a spin, and experience it all yourself.

SAY HI TO THE i20 ACTIVE

The i20 1.4L ACTIVE is the newest member of the i20 family. With a sporty body kit, matching red/blue interior accents, projection Bi-Function headlamps with static bending and LED Daylight Running Lamps, it's one of the most stylish new models on the road.

STAY CONNECTED

Life isn't going to wait until you're parked. So, hit the Bluetooth hands-free button on the steering wheel, pair your smartphone with the audio system, and make and receive calls through the 4" speaker sound system while you're on the go.

HEXAGON GRILLE

Introducing the Fluidic Sculpture 2.0 hexagon-shaped grille, inspired by the honeycomb – one of the strongest structures in the natural world. It's strong, durable, and ensures your new i20 turns heads on the road.

WHEN YOU NEED PARKING ASSISTANCE

Rear Park Assist lets you know if you're getting too close to something behind you, or if you still have room to move. The system works automatically as soon as you shift into reverse, and the increased beeping will tell you if you're getting too close. Available in the i20 Fluid and ACTIVE models.

GET FAR IN LIFE

The i20 comes with a 40L tank and two engine options. The 1.2L Kappa MPI engine delivers a combined figure of 5.9L/100KM and the 1.4 Kappa MPI engine and manual transmission delivers 6.5L/100KM, under testing conditions. Whichever one you choose, you'll be sure to go far.

FLOATING ROOFLINE

The roofline and exterior of the i20 are designed to allow the natural flow of air to move effortlessly over the car as you drive. With less air resistance creating less drag, you'll get a better performance on the open road.

GETTING YOU THERE SAFELY

Packed with hidden safety features, your i20 comes with driver and passenger dual airbags, seatbelt pretensioner system, and collapsible steering column. Tensile steel protection beams run along the inside panels of all the doors, so you're protected from every side.
